

Power Requirements

Production provided by client or venue - For Liquid Blue backline only:

Three (3) separate 20 Amp/120V circuits, each with a quad box, for the exclusive use of Liquid Blue. Each quad box must have standard 3 prong grounded receptacles. Two circuits placed at the back of the stage and one placed at the Keyboard position.

Production (Sound and Lights) provided by Liquid Blue:

Six (6) separate 20 Amp/120V circuits at the back of the stage dedicated to Liquid Blue and not shared with other vendors such as décor, lighting, or catering. Each circuit must have a standard Edison type 3 prong grounded receptacle.
